---

looks good here, looks very good. The movie is very high quality and so are you, I like that this is in 4k. I had to redo the beginning of the movie due to having no cable but I do agree, as it's not the highlight of every movie these days but it is a good way to keep the popcorn flowing. Also, all the extras are there, as is the original trailer. I can't remember where the original DVD copy went, or if it would even boot up in Windows 7. The download was about \$22 and this is \$30 for all the extras and all the extras with the first movie which is awesome cause these DVDs have been a big selling point. Great stuff! I have another set or two for my collection! One guy had a few sets at my house so I just kept it at home, but anyone is welcome to get one of them..
