In addition to standard speed and length controls, it offers a sequence generator, a real-time sequence randomizer (a chaotic, random spitting developing sequence) and a handy preset manager to save and retrieve your favorite sequences..) Another chapter like Sonar from Cakewalk focused more on supporting the work of midi sounds but with support for DirectX plugins instead of VST plug ability to write notes in spells, as in other virtual audio studio reasons with similar functions, suitable for creating audio loops, sampling, and with support Midi notes can be written on the piano roll.. And if you do not just have to go somewhere else to start a plug-in like Serum, you can have more Reason users in the tool.
